

We did a DRILL today!

TORNADO

Today, we learned a Tornado can strike at any time, any where! We have to be prepared and know what to do in case something happens. We discussed our Tornado plan for school and practiced the drill.

Now we need to do the same at home!

Parents, please review your emergency plans for your home with your children. Make sure they know what to do and where your family meeting place is located. Practice the drill, fill out the form below and return it to the teacher by _____.

How to do a drill at home:

1. Watch the weather on the news or listen to a weather radio
2. Put together a family emergency preparedness kit and a special one just for kids. If you already have one, review it and check to see if any food items have expired.
3. Practice as if there was a tornado in the area and have them do the following:
 - A. Grab their emergency preparedness pack.
 - B. Go to designated area, for example, a special place in the basement, If no basement, an interior room without windows (a closet).
 - C. Take cover. Kneel down, tuck head down and cover the back of their heads with their hands or a pillow.

Student's Name: _____

Student's Teacher: _____

School: _____

How long did the drill take? _____ minutes _____ seconds

What time of day did you do the drill: _____ Day _____ Night

Parent's signature: _____
